TEST & CONFORMITY CERTIFICATE

valid from January 2025 till May 2027

We hereby confirm that we manufacture and check Käfer Dial Gauges as per the following standards:

- Dial Gauges with a reading of 0,01 mm and ranges up to 10 mm: DIN EN ISO 463 / DIN 878:2006.
- Dial Gauges with a reading of 0,01 mm and ranges of 20 and 30 mm, Käfer manufacturing standard 90014.
- Dial Gauges with a reading of 0,01 mm and ranges of more than 30 mm: Käfer manufacturing standard 90002.
- Dial Gauges with a reading of 0,1 mm: Käfer manufacturing standard 90004.
- Dial Gauges series FEINIKA with a reading of 0,001 mm and a pointer revolution of 0,1 mm: Käfer manufacturing standard 90010.
- Dial Gauges with a reading of 0,001 mm or 0,002 mm and a pointer revolution of 0,2 mm: Käfer manufacturing standard 90001.
- Dial Test Indicators K 30 - K 48: DIN 2270.
- Dial Test Indicator in special version: Käfer manufacturing standard 90040.
- Comparator Gauges Compika: DIN 879-1.
- Thickness Gauges: Käfer manufacturing standard or customer requirement.

All Gauges are checked for accuracy and for their mechanical functions (100%-check). The testing equipment is regularly checked and has traceable accuracy to the German Calibration Service (DKD or PTB) as per ISO 9001:2015. The actual traceability is achieved by means of:
